- b) Commission fees for other sales: up to 10 % each from buyer and exhibitor.

Explanation of the changes to the schedule of fees

6h) Other fees

In 2022, parentage verification was changed to the so-called SNP technique. The associated materials, technology, labor, and data storage exceed the fee charged to date. At the same time, the SNP parentage verification technique is the basis for breeders to obtain future additional information, which can be read from the genome in addition to the parentage information.
